The Coronavirus: Getting Tested

Jenny Hillier, Speech and Language Therapist
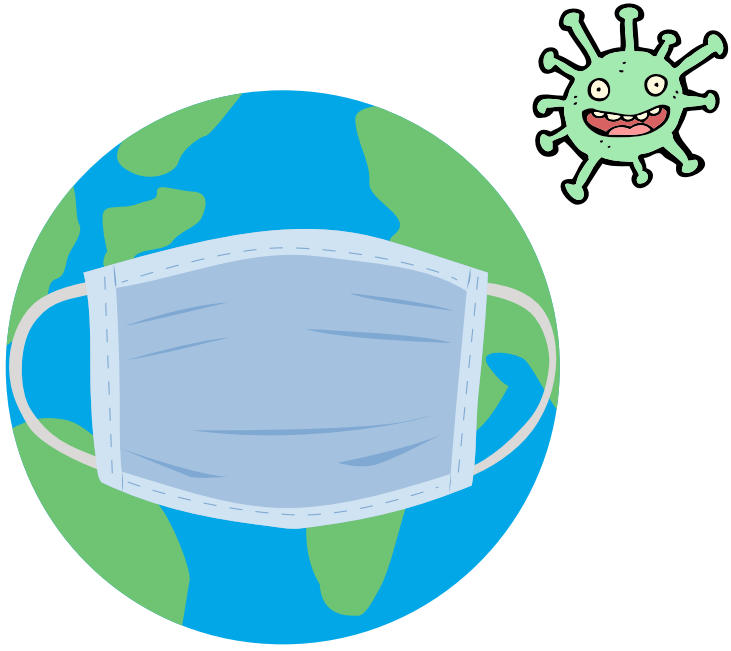

There has been a virus making people sick all over the world. It's a bit like a cold.

I'm feeling a bit sick so the doctor said I should go get a test for the Coronavirus.

This might be in a test centre with a doctor or nurse.

Or from the car like a drive-thru with the army. So cool!

The army men and women are very nice and are there to help us

Mom or Dad or someone special will be there with me the whole time.

The person who does my test will be wearing a mask and goggles.

First, they will ask me to blow my nose.

Then, they will take out a swab like this one.

They will put this in my nose or my mouth.

This might hurt a little bit but only for a minute, then I'll be OK!

Then we can go home again.
